

Sydney Richman

917-573-4166 | sydneyrichmann@gmail.com | [LinkedIn](#) | [Personal Website](#) | [Github](#)

New York City Metropolitan Area | Washington, DC

Education

University of Maryland

B.S. Computer Science + Women's, Gender, and Sexuality Studies Minor

College Park, MD

Expected Graduation: June 2027

Universidad Carlos III de Madrid (UC3M)

Study Abroad Program

Madrid, Spain

January 2026 – June 2026

Relevant Coursework: Introduction to Computer Systems, Discrete Structures, Calculus 2, Data Structures & Algorithms, Linear Algebra, Organization of Programming Languages, Algorithms, Mastering the PM Interview, Game Theory, Machine Learning, Communications Networks and Services

Technical Skills

Languages: Java, Python, OCaml, C, HTML, CSS, JavaScript, React, Vue, React Native

Tools/Frameworks: Git, MongoDB, AWS (Amazon Web Services), Figma, CAD, JUnit

Experience

Apple

Incoming Software Engineer Intern

Austin, Texas

June 2026 - September 2026

Amazon

Software Development Engineer Intern

Manhattan, New York

May 2025 - August 2025

- Built an inline action feature within the MYG platform that reduced the number of clicks required to complete an action, increasing click-through rate and improving user experience
- Created a frontend interface to display recommendation data, ensuring seamless interaction between APIs, the database, and the user interface; developed backend functionality by designing schemas, implementing resolvers, and integrating two APIs (preview and submission), enabling real-time data retrieval and user submissions
- Improved reliability by writing unit and integration tests and leveraging AWS services such as Lambda and CloudWatch to validate API connectivity and monitor system health
- Collaborated with product managers, designers, and partner teams to define project scope, expectations, and system design; authored a comprehensive design document and system diagrams to communicate architecture and API interactions

Dux

VP of Product Management

College Park, Maryland

August 2024 - November 2024

- Lead the end-to-end development of 'Pre-made' and 'Remote' experience features, by identifying user interest via feedback forms and customer polling, resulting in a 10x growth in guide acquisition (5 to >50)
- Identified a low conversion rate by analyzing user drop-off points at each step; therefore, optimized the guide onboarding funnel by redesigning profile requirements, reducing completion time by 50% while maintaining data integrity; successfully moved the feature from user research through to production deployment
- Executed A/B tests on ads to gather data-driven insights that optimized for maximum reach and conversion

Software Engineer Intern + UI/UX Designer

June 2024 - August 2024

- Developed a scalable full-stack platform using MongoDB, designing custom schemas and APIs to streamline data flow and delivering a responsive frontend that reached >100 active users within the first three months
- Designed and wireframed a scalable user interface from scratch, prioritizing intuitive navigation and user flow, which served as the blueprint for the entire frontend architecture

Projects

Gym Tracking Tool (Partment Pal) | *HTML, CSS, and Javascript*

- Developed a website for a local gym with >60 members that integrated a customization plugin to manage sign-ups and process vaccination documentation during the COVID-19 pandemic
- Implemented measures to boost operational efficiency at a local gym by instituting a cap of 6 individuals allowed on-site and introduced a real-time occupancy tracker for members

Additional Information

Interests: Yoga, Running, LEGOs, Reading, Puzzles, Cooking, Journaling, Podcasts (*How I Built This* & *On Purpose*)
